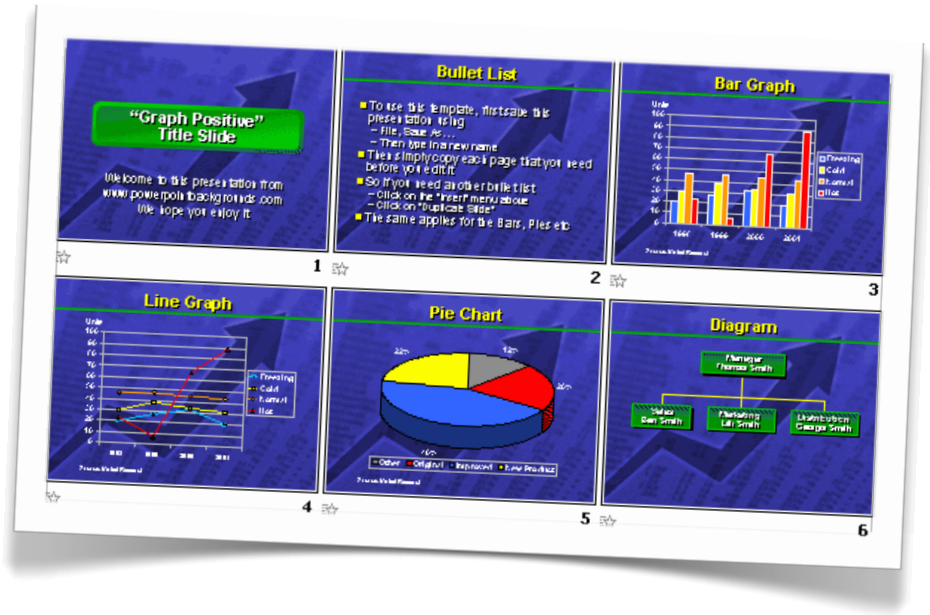
Standard templates
(like the ones found in Powerpoint)
are **FUGLY** and don't communicate, they **KILL!**

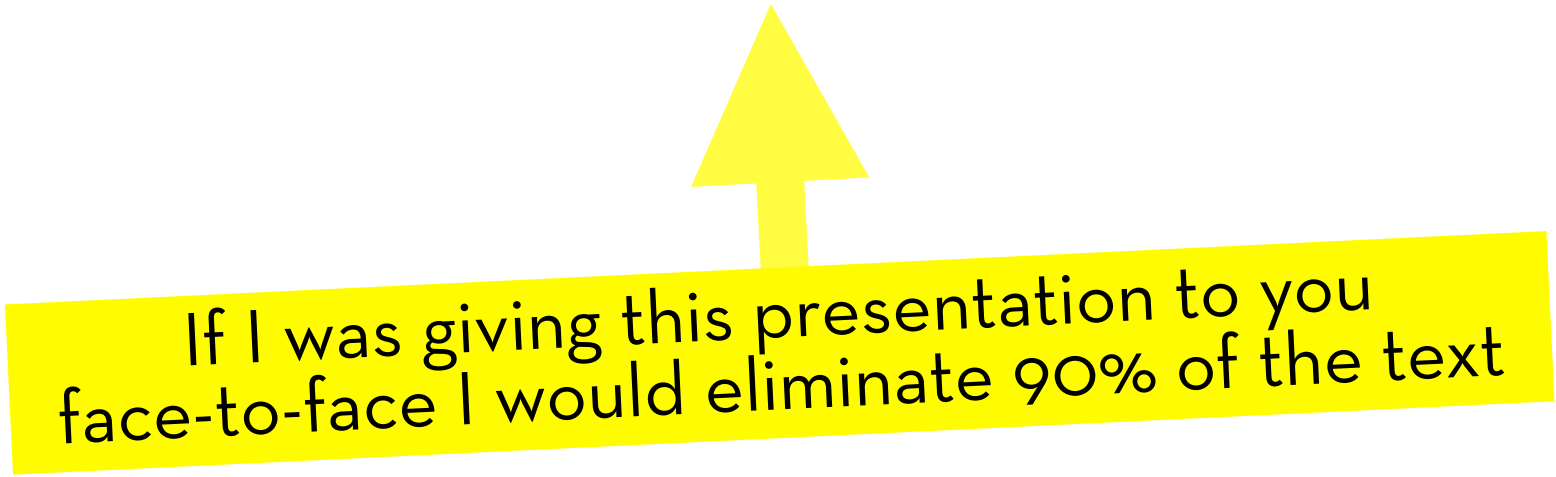


You can do better!

1.
HAVE A KILLER OPENING SLIDE

Your audience reads your slides
faster than you talk.

Never, ever, ever put word-for-word what
you are saying, instead use strong visuals to
help add to your story and not give it away
before it comes out of your mouth.



EXAMPLES:

"I want to talk to you about early childhood medical care..."

"Here's what's happening with sales of luxury french goods..."

"In freshman year i studied..."
(kidding)

GRAPHS ARE OK, BUT REMEMBER:

IT'S NOT ABOUT THE NUMBERS, IT'S ABOUT WHAT THE NUMBERS MEAN

The lesson?

Spend your time being 'cooler' and the followers will come

BUT...

THESE SLIDES ARE AN EXAMPLE OF WHAT YOU SHOULD NOT DO

DEAR NSA

DEAR NSA,

A quick work by Emiland De Cubber
@emilanddc - www.emilanc.me

Dear NSA,

You can do whatever you want with my data.

But not with my eyes.

Those slides are hideous.

I would have expected better from you...

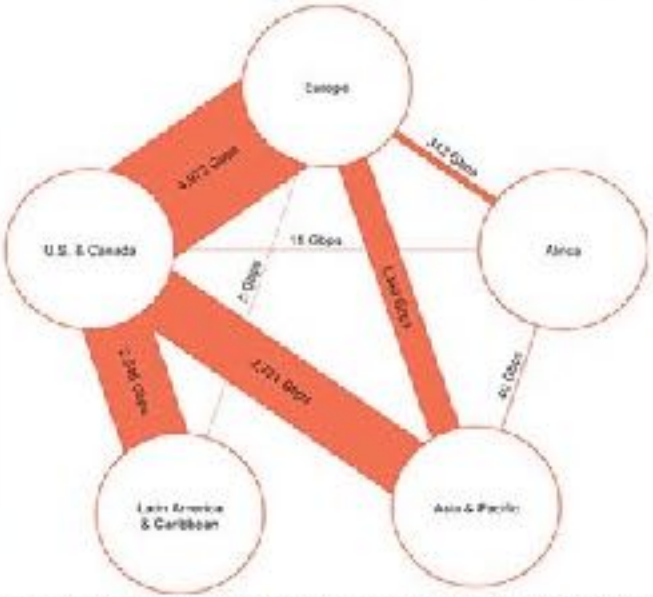
(TS//SI//NF) Introduction

U.S. as World's Telecommunications Backbone

PRISM

- Much of the world's communications flow through the U.S.
- A target's phone call, e-mail or chat will take the **cheapest** path, **not the physically most direct** path – you can't always predict the path.
- Your target's communications could easily be flowing into and through the U.S.



International Internet Regional Bandwidth Capacity in 2011

(TS//SI//NF) PRISM Collection Details

Current Providers

- Microsoft (Hotmail, etc.)
- Google
- Yahoo!
- Facebook
- PalTalk
- YouTube
- Skype
- AOL
- Apple

What Will You Receive in Collection (Surveillance and Stored Comms)?
It varies by provider. In general:

- E-mail
- Chat – video, voice
- Videos
- Photos
- Stored data
- VoIP
- File transfers
- Video Conferencing
- Notifications of target activity – logins, etc.
- Online Social Networking details
- **Special Requests**

CHECK AND RECHECK!

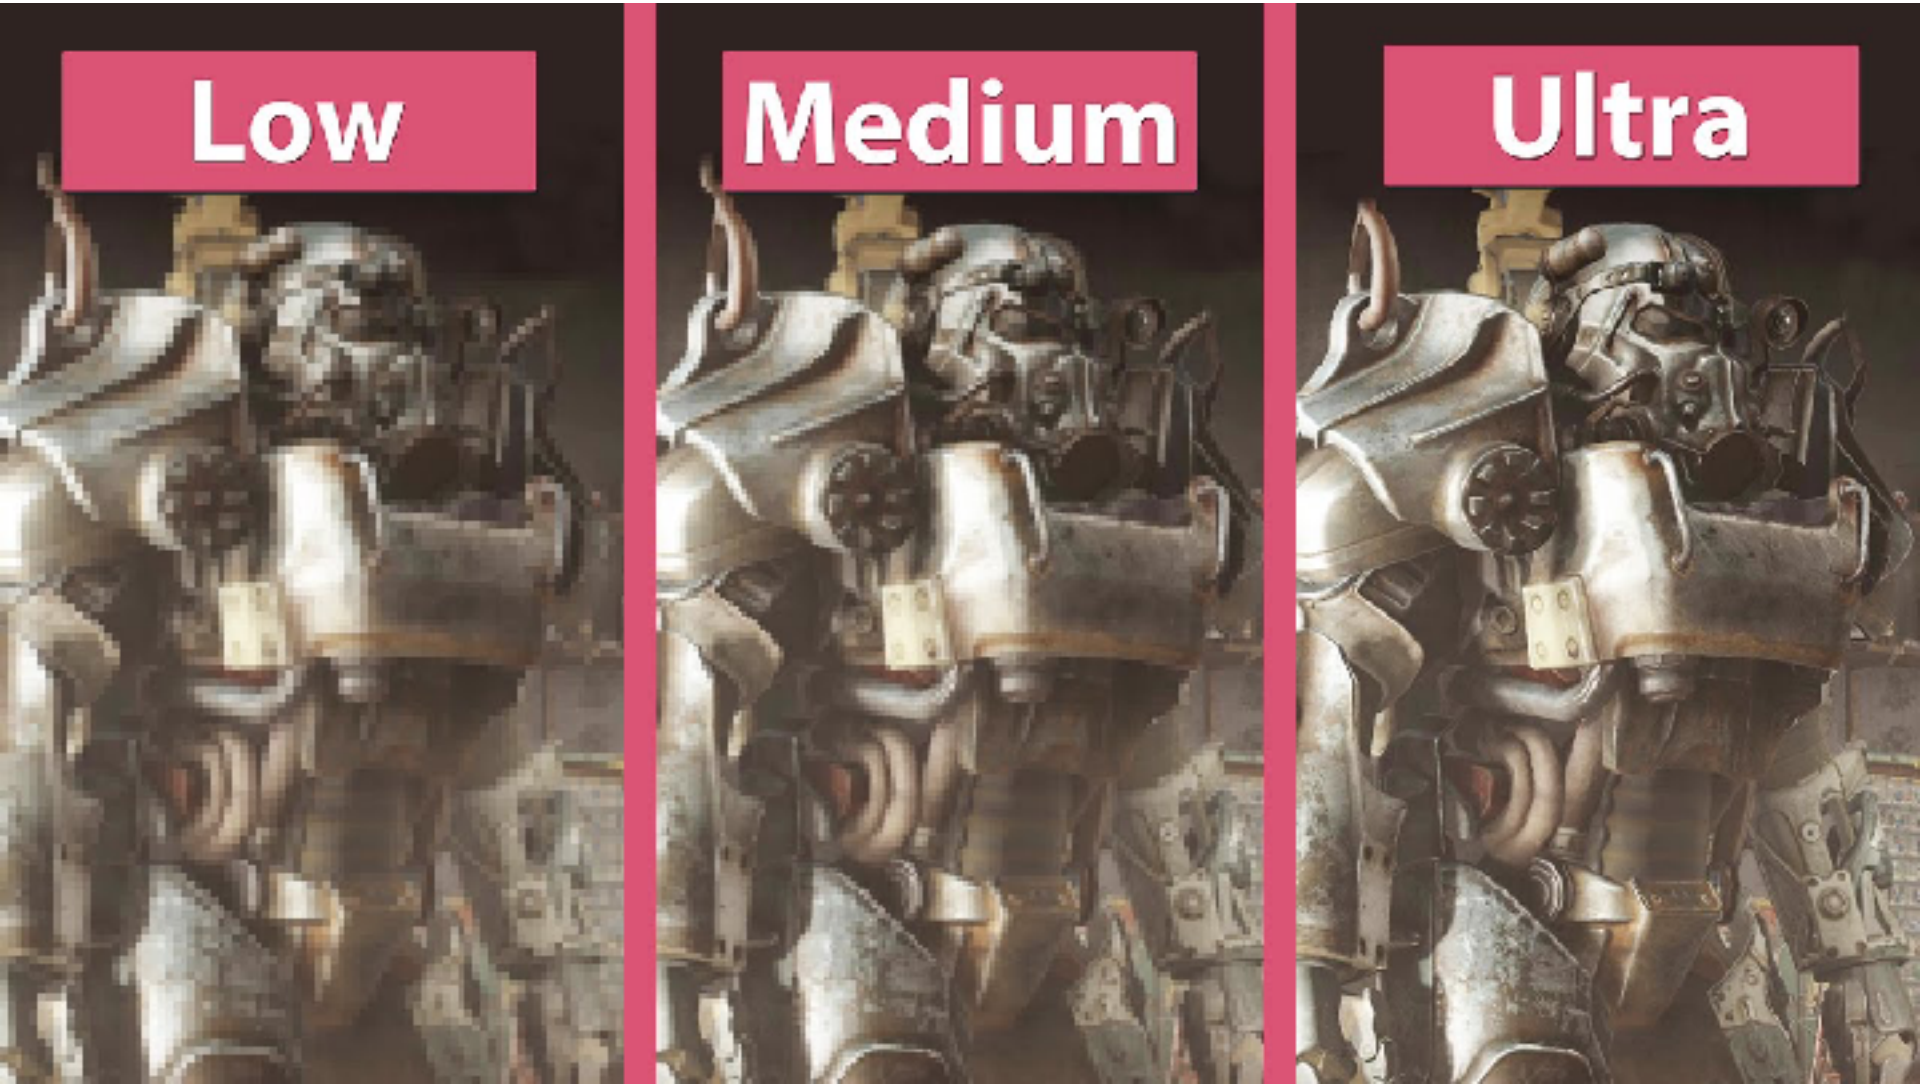
- Verify typos end other mistakes
- Mistekes are vary, vary bed for your work
  - ✓ In both papers and slides
- Suggestion
  - ✓ Be careful from the beginning

CONTROL YOUR VOICE

- Neither too loud nor too low
- Neither too fast nor too slow

Video (again)

QUALITY OF FIGURES



AVOID LIGHTNING YOURSELF

STRANGE SITUATION

FURTHER RECOMMENDATIONS

- Going back and forward (slides)
- Excuse-me, but I did not prepare well…
- If you are nervous, forget the pen
- Water for longer presentations
- Cell phone
- Etc.

SOME DON'TS

COLOR SCHEME

- Can you read this?
- And this
- And this one?

HORRENDOUS BACKGROUNDS

Catchy Slide Title

Nested stuff for demonstration purposes:

- Hey one two
  - One.. one..
    - One two
  - Say say
    - say one two
- One two
- Like Gentoo
  1. Come on
  2. please
  3. say now:
- One two

AVOID UNNECESSARY STUFF

- I am the main message of the slide
- But can you see me?

US-CERT

Amit Yoran

US-CERT and the Multi-State ISAC are working together on a number of programs, including this webcast series, to help enhance our Nation's cyber security readiness and response. The Multi-State ISAC has recently become a member of the US-CERT portal, which provides a secure mechanism for sharing information between and among partners, improving cyber preparedness, readiness and response capabilities.

US-CERT also hosts a public website, at www.us-cert.gov, which provides a wealth of information regarding cyber security – helpful tips for protecting against cyber security threats; cyber security alerts and bulletins, as well as the ability to sign up to receive free cyber security alerts via email.

National Webcast Initiative

FY08 and Beyond

Pathophysiology of Hirschsprung Disease

- Congenital aganglionosis of the distal bowel defines Hirschsprung disease. Aganglionosis begins with the anus, which is always involved, and continues proximally for a variable distance. Both the myenteric (Auerbach) plexus and the submucosal (Meissner) plexus are absent, resulting in reduced bowel peristalsis and function. The precise mechanism underlying the development of Hirschsprung disease is unknown.

- Enteric ganglion cells are derived from the neural crest. During normal development, neuroblasts will be found in the small intestine by the 7th week of gestation and will reach the colon by the 12th week of gestation.[3] One possible etiology for Hirschsprung disease is a defect in the migration of these neuroblasts down their path to the distal intestine. Alternatively, normal migration may occur with a failure of neuroblasts to survive, proliferate, or differentiate in the distal aganglionic segment. Abnormal distribution in affected intestine of components required for neuronal growth and development, such as fibronectin, laminin, neural cell adhesion molecule (NCAM), and neurotrophic factors, may be responsible for this theory.[4, 5, 6]

- Additionally, the observation that the smooth muscle cells of aganglionic colon are electrically inactive when undergoing electrophysiologic studies also points to a myogenic component in the development of Hirschsprung disease.[7] Finally, abnormalities in the interstitial cells of Cajal, pacemaker cells connecting enteric nerves and intestinal smooth muscle, have also been postulated as an important contributing factor.[8, 9]

- Three neuronal plexus innervate the intestine: the submucosal (ie, Meissner) plexus, the intermuscular (ie, Auerbach) plexus, and the smaller mucosal plexus. All of these plexus are finely integrated and involved in all aspects of bowel function, including absorption, secretion, motility, and blood flow.
